

Project Design Phase
Proposed Solution Template

Date	11 September 2026
Team ID	SWUID2026190372
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Patients face long waiting times, manual paperwork, and difficulty in booking diagnostic tests, tracking appointment status, and collecting reports. Diagnostic center staff also find it difficult to manage appointments, reports, and payments using manual processes.
2.	Idea / Solution description	The Medical Diagnosis Center is a ServiceNow Service Portal application that allows patients to register, book diagnostic tests, select appointment slots, track appointment status, download reports, and make online payments. It also helps hospital staff manage appointments, reports, and workflows in one centralized platform.
3.	Novelty / Uniqueness	This solution combines patient registration, appointment booking, report management, payment tracking, email notifications, and workflow automation in a single ServiceNow application. It provides a digital and paperless healthcare experience with role-based access for different users.
4.	Social Impact / Customer Satisfaction	The application reduces waiting time, minimizes paperwork, provides online report access, and improves communication through automated notifications. Patients receive faster and more convenient healthcare services while staff can manage operations efficiently.
5.	Business Model (Revenue Model)	Revenue is generated through diagnostic test bookings, health checkup packages, online payments, and optional home sample collection services. The system also helps reduce operational costs through automation.
6.	Scalability of the Solution	The application is built on the scalable ServiceNow cloud platform. New diagnostic tests, departments, users, branches, payment gateways, and healthcare services can be added easily without changing the core application.
